

Today it is not enough to “think” that your IT systems are protected from the viruses, trojan horses, spyware, hackers, and exploiters that are rampant . You have to know.

rtProtect gives you the assurance you need in today’s competitive business environment.

rtProtect includes the following Services:

- Managed Intrusion Detection and Prevention
- Antivirus Management and Updates
- Web Content Management and filtering
- Patch Management for Windows Systems
- Firewall Log Management and Monitoring
